

City of Apple Valley Backflow Preventer Requirements

1. Backflow preventers are regulated by Minnesota Plumbing Code Section 4714.0603.
2. The installation, removal or replacement of any backflow prevention device requires a permit. The following information must be provided to the City of Apple valley Inspections Department when installing, removing or replacing a backflow preventer.
 - a. Manufacturer
 - b. Size
 - c. Model Number
 - d. Serial Number
 - e. Name and License of Installer/Tester
 - f. Date
3. Testable backflow prevention devices shall be tested annually. More frequent testing may be required. Individuals testing/maintaining backflow prevention assemblies must be certified in addition to being licensed or registered by the DLI.

A resident homeowner may install a backflow preventer, but must have the required annual testing done by an ASSE certified tester (this includes the test required after initial installation).

4. During a test, if it is determined an overhaul of the device is needed; the overhaul must be performed by a licensed, ASSE certified plumber. A plumbing permit is not required for the annual testing or an overhaul of a backflow preventer.
5. Results must be submitted to the City of Apple Valley Inspections Department for the testing and/or overhauling of all testable backflow prevention devices. Please mail backflow test/maintenance reports to: City of Apple Valley, Attn: Building Inspections, 7100 147th Street W, Apple Valley MN 55124. Reports may also be submitted via fax (952-953-2515) or via email (backflow@cityofapplevalley.org).

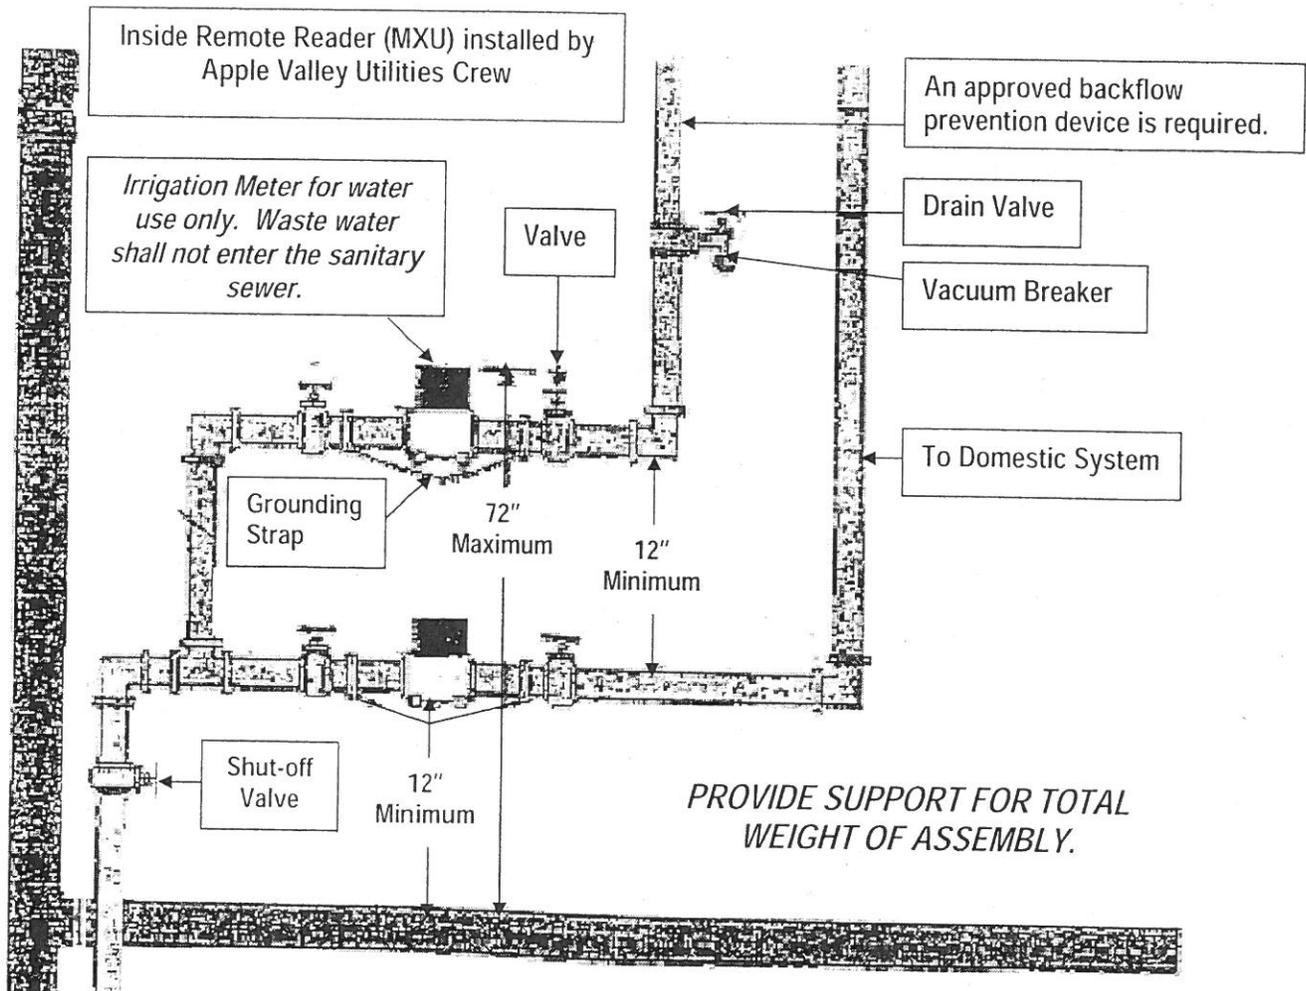

Commercial Irrigation Meter Installation Guidelines

Water meters installed for lawn irrigation and sprinkler systems shall be installed in parallel. Irrigation meters installed as a deduct meter are not permitted. Contact Public Works at 952-953-2400 for more information.

Installation of irrigation meters in parallel allows for the independent reading of each meter, eliminates the need to calculate water use utilizing both the irrigation and domestic meter, and maintains consistency with established installation practices.

Backflow Preventers

D. Hose connection vacuum breaker (Hose VB)

- (1) required for threaded hose connections;
- (2) back pressure not permitted;
- (3) continuous line pressure not permitted; and
- (4) any new device must be field testable. *

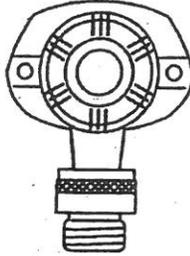

Unprotected
Hose Bibb

Not allowed on potable water system. A backflow preventer which meets ASSE Std. 1052 must be installed. (See Fig. 3) or a code approved backflow preventer is installed upstream of the hose bibb.

Fig. 1

Not Field Testable
ASSE Std. 1011

Field installed hose bibb vacuum breaker ASSE Std. 1011 is not field testable.

Mop sink faucet with integral atmospheric vacuum breaker and hose thread on spout.

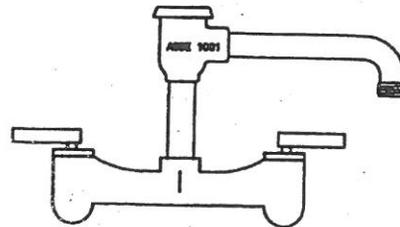

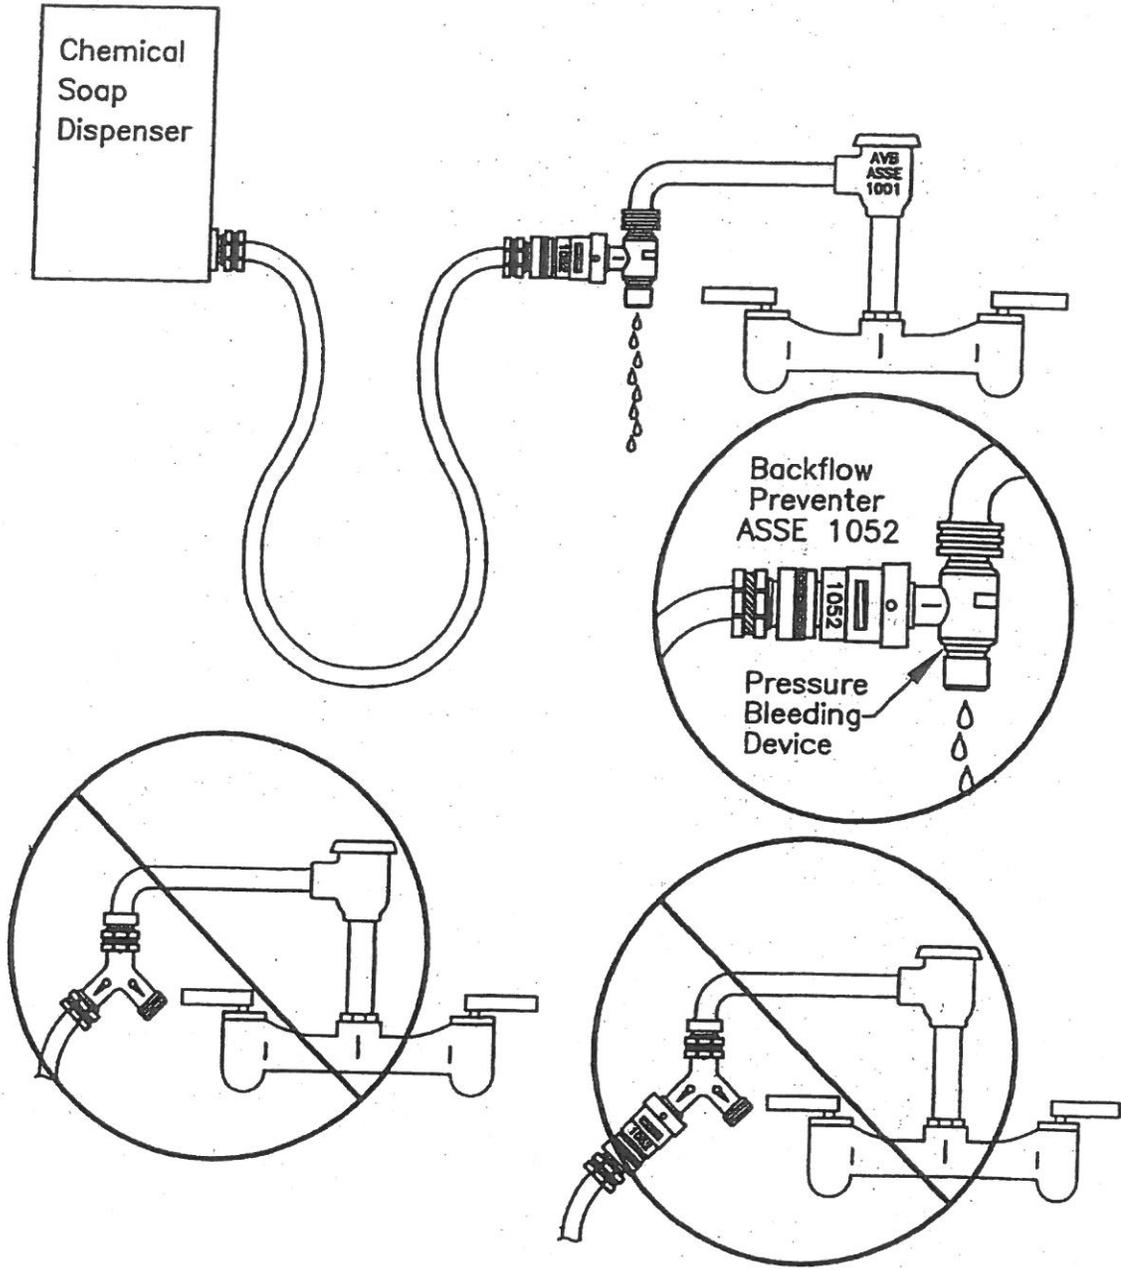

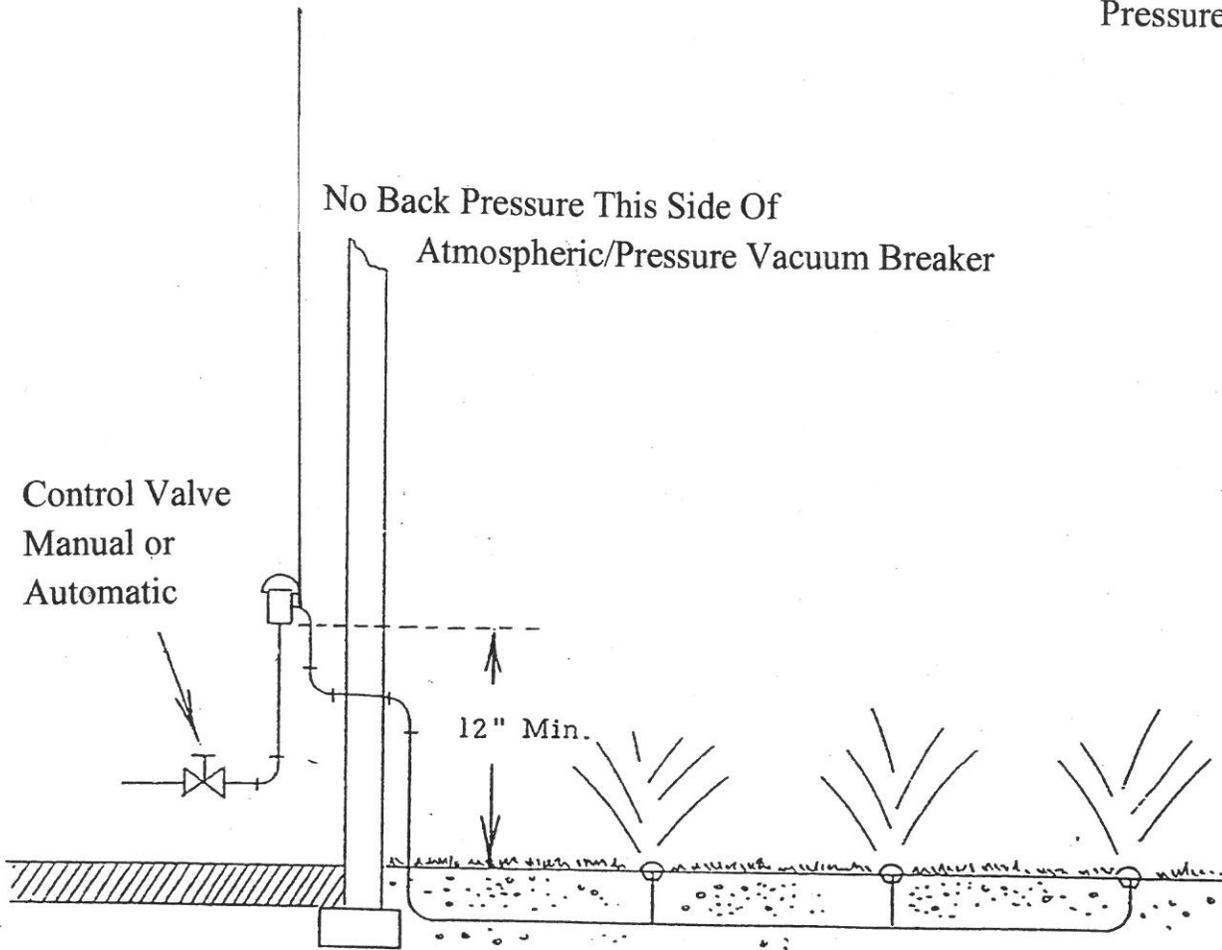

Fig. 6

2015 MN Plumbing Code

4714.0603 CHEMICAL/SOAP DISPENSING SYSTEMS

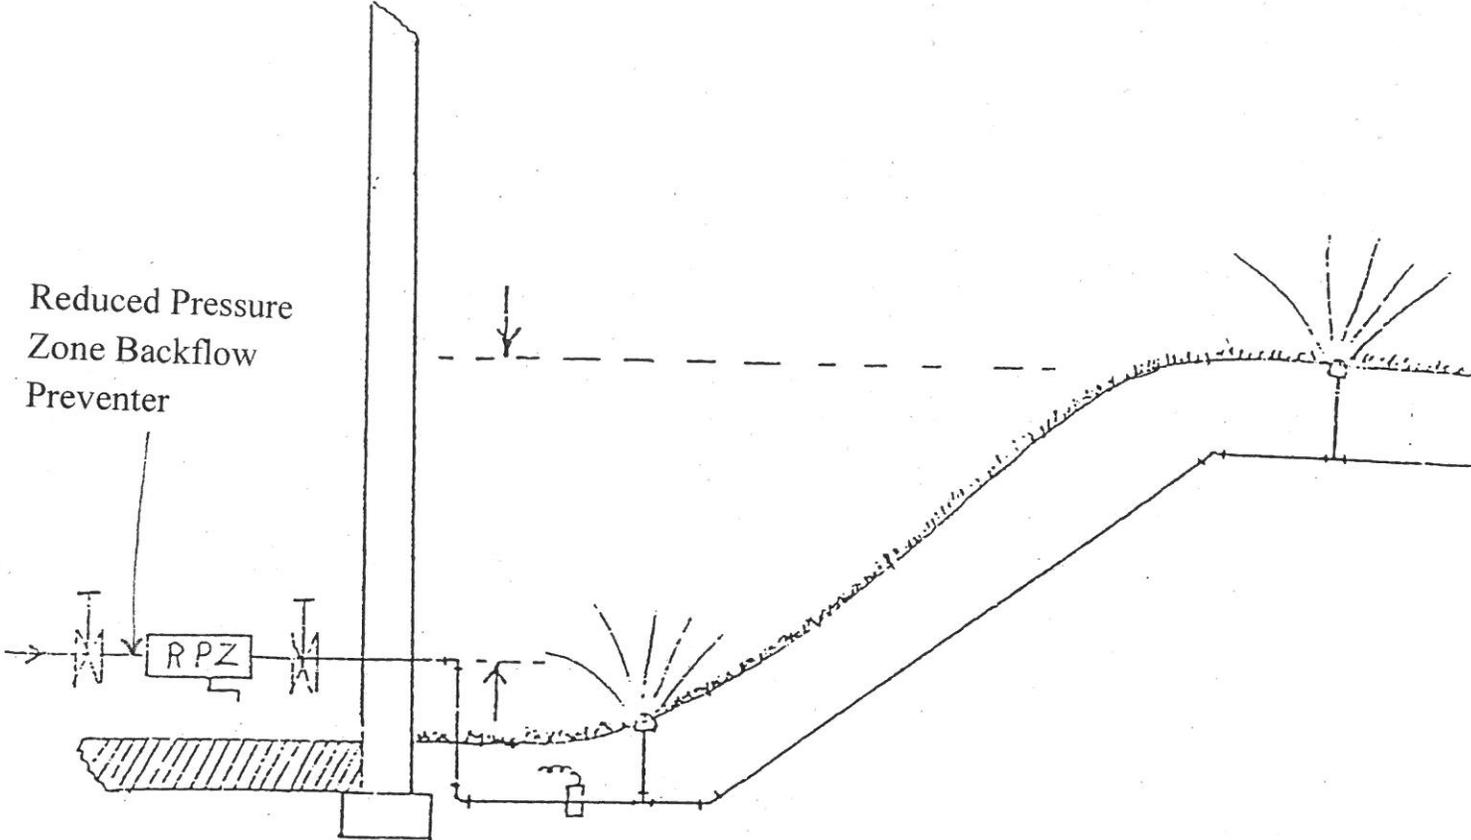

Vacuum Breakers
Atmospheric and
Pressure Type

Atmospheric or pressure vacuum breaker on lawn sprinkler system must be installed at least 12 inches above the highest sprinkler outlet and on the non-pressure side of the last control valve.

Reduced Pressure Zone
Backflow Preventer

A Reduced Pressure Zone Backflow Preventer must be installed on lawn sprinkler systems when any sprinkler outlet is higher than the backflow preventer (may be subject to constant static pressure, back pressure and back syphonage).

Describe the type (RPZ/PVB etc), model, location and purpose:

All backflow prevention devices shall only be installed by a licensed plumber or the resident homeowner.

Sprinkler systems installed within the right-of-way shall be maintained and/or repaired by the sprinkler system owner. This includes, but is not limited to, repairs necessary because of damage caused by city snow-plowing operations.

A method for draining the system should be provided on the sprinkler system side of the backflow prevention device.

A water permit is also required and a water inspection is required when a plumber cuts into a water main or any pipe on the street side of the water meter. Contact the engineering department for more details.

A permit is issued on the condition that all work shall be done in accordance with the Apple Valley City Code. Permits remain active for 6 months.
