

CITY of APPLE VALLEY  
2017 STREET & UTILITY IMPROVEMENT PROJECT  
PROJECT NO. 2017-104

**UPDATED**  
**STREET PAVING NOTICE**

October 24, 2017

The final paving on your street is scheduled to be done on **Monday and Tuesday 10/30 & 10/31**, weather permitting. Work should be completed by midafternoon on 10/31. **Please DO NOT park on the streets or blow grass clippings into the street as it WILL delay the paving schedule.** No parking signs will be placed Friday 10/27/17 in reference to Monday Morning. You will have access to your homes during the paving process except when the tack coat has been placed. PLEASE READ BELOW FOR MORE INFORMATION.

**\*\*\* CONCRETE DRIVEWAYS AND TACK COAT \*\*\***

Part of the process for placing the final layer of pavement is applying a 'tack coat' to the existing pavement. This tack coat acts as a bonding agent between the two layers of asphalt. This coating is not applied to the entire project at one time but applied to each street just before it is paved. The tack coat will give the surface a wet looking appearance and is extremely sticky. This material will 'track' with vehicle tires and will stain concrete driveways and sidewalks. TO AVOID DAMAGE, PLEASE REFRAIN FROM DRIVING ON THE TACK COAT AND THEN DRIVING ONTO YOUR DRIVEWAY. IF YOU MUST DRIVE ON THE TACK COAT, DRIVE SLOWLY TO PREVENT IT SPRAYING ONTO YOUR VEHICLE.

**Thank you in advance for your patience and cooperation.**
